Plastic Surgeon Allan Parungao, MD, to Speak Feb. 20 at Oak Park Library

Who is a good candidate for liposuction? How can body lift surgery help patients after gastric bypass surgery? Are silicone gel breast implants better than saline? On Feb. 20, board-certified plastic surgeon Allan Parungao, MD, will answer these and many other questions at 7 p.m. at the Oak Park Public Library, 834 Lake Street, in Oak Park, Illinois.

Oak Park, Ill.—Jan. 24, 2007—Women and men considering plastic surgery have plenty of questions. Dr. Allan Parungao has the answers.

On Feb. 20, Dr. Parungao will host an informative presentation on his new book, *A Woman's Guide to Cosmetic Breast Surgery and Body Contouring* (Addicus Books, 2006).

Dr. Parungao will present before-and-after photos of:

- Women who have achieved a beautiful, shapely bustline through breast implants, breast lift surgery and breast reduction
- Women and men who have eliminated their love handles and streamlined their hips, thighs and waistlines through liposuction
- Women who have regained their youthful figure with a tummy tuck after having children
- People who have gotten rid of loose, hanging skin with body lift surgery following massive weight loss

Most importantly, Dr. Parungao will answer questions from the audience.

Dr. Parungao realizes that many people are shy about asking questions in a group setting. To protect individuals' privacy, he will provide an opportunity for attendees at the presentation to submit their questions confidentially in writing.

For more information on the Feb. 20 presentation, call Dr. Parungao's office at 708.660.3223. The first 50 people who respond will receive a complimentary copy of Dr. Parungao's book at the event.
